SUMMARY

Budding web developer with a flair for creating User Experience driven solutions. I have a growing adeptness towards optimization of browser resources and network requests.

Developed a facial recognition software using the MERN stack.
I am also passionate about data science, and machine learning.

Active member of 100DaysOfCode, ZeroToMastery and FreeCodeCamp communities.

EXPERIENCE

MERN Stack Developer

Zero To Mastery

📅 08/2019 - 11/2019   📍 Toronto, Ontario Canada

- Designed functional and optimized user interfaces using React, utilizing the Clarifai API.
- Worked on optimizations of network requests and API calls.
- Bridged front-end and back-end applications using the Fetch API.

Responsive Web Designer

FreeCodeCamp

📅 01/2018 - 04/2019
📍 San Francisco, United States

- Built interactive interfaces that improved the user experience.
- Developed amazing colour schemes that were appealing to the users' eyes.
- Followed strictly the principles of responsive web design using media queries and responsive images.
